How we keep your information safe

School Encryption

Arbor encrypts your information both within your school, and end-to-end for processing, using the latest 256bit SSL protection. This ensures that only you can view your data.

Password Protection

Each user is issued with a unique and secure password, ensuring that they can only view the data relevant to them. As a default, no data is stored on any device, and Arbor automatically logs out after a period of inactivity.

Legal Protection

Arbor is a Data Processor and abides by all of the terms of the Data Protection Act 1998.

We're also registered with the UK Government on the G-Cloud IV Framework, as an approved supplier of cloud-based services.

High Security

We take security very seriously at Arbor. To even access our own servers, we have to pass through two factor authentication, twice! All staff have passed enhanced DBS checks each year, and our data is monitored in a secure compound in the British Isles.
